TO WHOM IT MAY CONCERN

I, Dr. Abdullah Munir, an Associate Professor at NED University with a PhD in high voltage electrical engineering from the University of Technology Malaysia (UTM) in 2022, Leakage Current Based Online Condition Monitoring of Metal Oxide Surge Arresters with Harmonics Compensation, am writing to highly recommend Mr. Ayan for any opportunity in the field of electrical engineering. I have had the pleasure of teaching and mentoring Mr. Ayan for the course "Alternate Energy Systems" (EE-412). I had the privilege of witnessing Ayan's remarkable abilities, dedication, and passion for the subject matter.

During his time at NED University, Mr. Ayan excelled in designing and implementing a Mathematical and Electrical Model of Fuel Cells using MATLAB/SIMULINK, showcasing exceptional academic prowess. His deep understanding of theoretical concepts, practical problem-solving skills, and focus on optimizing fuel cell cost-effectiveness reflect his technical expertise and innovative approach in the field of alternative energy.

Mr. Ayan's commitment to excellence extends beyond the classroom. He actively engages in extracurricular activities and demonstrates strong leadership qualities. He has been a valuable contributor to various student organizations, serving as the president of the IEEE PES NEDUET Society, and organizing several successful events and initiatives.

I wholeheartedly recommend Ayan for admission to Türkiye Scholarship and fully support his aspiration to pursue advanced education at the PHD level and beyond. I am confident that he will excel academically, contribute positively to the university community, and emerge as a successful and accomplished student. If you have any further questions regarding his abilities or this recommendation letter, please feel free to contact.

Dr. Abdullah Munir
Assistant Professor, Department of Electrical Engineering
