TO WHOM IT MAY CONCERN

It is my great pleasure to recommend Mr. Ayan Ali for admission to your PhD program. I am Dr. Artemov Kirill, a faculty member at ITMO University, where I have had the privilege of teaching and supervising Ayan during his master's program in Robotics and Artificial Intelligence.

I first met Ayan as his instructor in Robot Programming I and II, courses that form the foundation of robotic system design, motion control, and software integration. Throughout both semesters, Ayan demonstrated exceptional understanding of programming for robotic applications, excelling in assignments that required algorithmic thinking, control design, and real-time implementation. His grasp of both the theoretical and practical dimensions of robotics distinguished him as one of the most capable students in the class.

Currently, Ayan is conducting his master's research thesis under my supervision, focusing on sensor fusion and deep learning for real-time object detection and tracking in autonomous systems. His work integrates YOLO-based computer vision models with LiDAR perception to enhance the situational awareness and reliability of autonomous robots. This project showcases his ability to combine advanced AI techniques with robotic system development, reflecting both creativity and strong technical proficiency.

Ayan consistently displays analytical rigor, programming expertise, and innovative problem-solving skills. He is proficient in Python, C++, and robotics frameworks such as ROS, and he effectively applies machine learning tools to practical robotics problems. His research maturity, independence, and commitment to quality make him well-prepared for the challenges of doctoral-level research.

In addition to his technical strengths, Ayan is an articulate communicator and an excellent team collaborator. He contributes thoughtfully to academic discussions, mentor's peers

when needed, and demonstrates leadership in interdisciplinary projects. His intellectual curiosity and motivation to explore emerging technologies are evident in his proactive approach to learning and experimentation.

At a personal level, Ayan is diligent, responsible, and deeply motivated. He approaches every challenge with perseverance and creativity, maintaining a balance of discipline and enthusiasm that inspires confidence in his future success.

I strongly recommend Ayan Ali for admission to your PhD program. He is a promising young researcher with the potential to make meaningful contributions to the fields of robotics, computer vision, and artificial intelligence. I am confident that he will excel in any rigorous academic and research environment he joins.

Please feel free to contact me if further information is required.

Artemov Kirill

Associate Professor, ITMO University

PhD in Technical Sciences

Faculty of Control Systems and Robotics – Lead Engineer
